PROFESSIONAL EXPERIENCE

ADEPA GLOBAL SERVICES LUXEMBOURG (FUND ACCOUNTING)

MUNSBACH, LUXEMBOURG

Intern

JUNE 2025 - AUGUST 2025

- Supported fund accounting operations in eFront across 10+ funds, including invoice booking, capital calls, and bank reconciliations building hands-on exposure to the operational mechanics behind investment vehicles.
- Reviewed valuation packs and weekly reporting, strengthening understanding of fund structures, investor reporting, and the way financial data flows through reporting, control and valuation processes.
- Prepared daily client correspondence in a regulated environment, reinforcing accuracy, responsiveness, and professional communication while handling operational matters requiring attention to detail and consistency.
- Gained exposure to different fund structures, capital activity, and reporting processes relevant to the broader investment lifecycle, including the interaction between accounting data, investor reporting, and fund operations.

EARLIER STARTUP INTERNSHIPS: ZENVIEW, VRCREATIVE, LUXAI

Luxembourg

Intern

Summers 2019-2020

- Developed VR environments, a virtual shop project, and supplier research, building early exposure to entrepreneurial environments, structured research, and practical problem-solving.

SKILLS

Financial analysis and modelling/forecasting, company and market research, business analysis, scenario analysis, fund operations, financial statements analysis, multi-agent systems, Python, Excel, Power BI, end to end project management..

LANGUAGES

English (fluent; 15+ years of academic and professional practice), French (native), Spanish (conversational), German (basic).

MAJOR PROJECTS

- Built an AI co-pilot workflow to gather and structure online company information for deal sourcing, early-stage screening, and market mapping, focusing on merging fragmented information into usable datasets and exploring automated research.
- Developed forecasting and scenario-analysis projects to compare assumptions, assess downside and upside cases, and support more structured decision-making in business and investment-related contexts.
- Forecasted the EV market in Spain by leveraging macroeconomic insights to estimate growth trajectories; awarded in a datathon.
- Developed an AI assisted collaboration tool to automate online searches and tracking processes exploring improvements in efficiency.
